THRUSTS

Focused
Tourism,
Trade,
Investment,
and
Employment

Developing trade, investment and tourism activities enable micro, small and medium enterprises to grow, diversify, and flourish in order to bring employment and incomes for resilient local economy.

Integrated
Infrastructure
Development

Integrating infrastructure to support agri-fishery and ecotourism initiatives such as farm-to-market roads, providing post-harvest facilities, and developing market infrastructure.

Responsive
Health Care
and Social
Welfare and
Services

Promoting integrated local health systems and building the capacity of local health personnel to deliver quality health services in order to produce healthy population.

Increasing the capacity to improve the delivery of social protection and social welfare services; and the well-being of beneficiaries

Sustainable
Local
Economy

Improving the agri-fishery and agri-eco-tourism economy by strengthening the links between farmers, producers and consumers strengthening the role of farmers' associations and cooperatives.

Nature-based solutions and innovations to rehabilitate and restore the environment for sustainable food production and tourism experiences will be supported.

Trusted
Fiscal and
Bureaucratic
Management

Promoting a trusted fiscal management through revenue generation strategy and technical support in planning, budgeting, and accounting, and a human resource management system.

Aligning the programs and projects and collaborating among various internal departments and external stakeholders to accelerate economic recovery and resilience.
